# PIRATES

NO 1 IN EUROPE

30th ANNIVERSARY 1962 - 1992

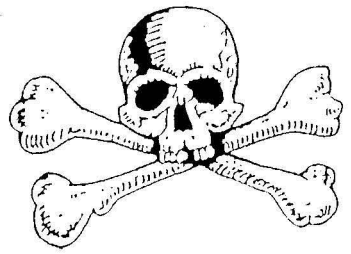

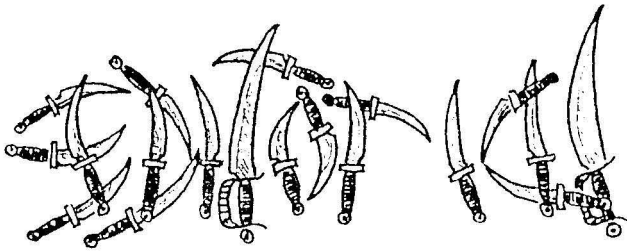

THE AMAZING SPIDER-MAN

HOBBIT 92

Shocking FX

Dear Sailors,

We finally sobered up after the huge success of our latest trip to Atlantis III We set course for another destination but unknown II

Meanwhile we celebrated Easter and are heading for X-MAS III We also welcome our latest crew-member, IRON MAIDEN which will hopefully be a great contribution to our staff III

We must also thank our compatriots out there on the wide ocean for supporting us on our dangerous journeys and for sending re-enforcements all the time.....

Well so far '92 has been a remarkable year III 2 issues of Pirates in less then 6 months, Thor got fatter'n even more stupid, DOM had 2 first-releases in the last 12 months and our ship hasn't sunk yet IIIII Still due to some heavy storm weather some of the information ended up being lost III So you'll find on page 14 a photo of Sauron/Is and his brother (not Fist/Is) and on page 15 the top piccie is ofcoz Jack Droopis/DOM.

And please notice that the crew-members are not responsible for eventual depressions or suicide attempts after completing this issue....

See you on our next trip,

RED-BEARD

Beneath MWS and Parson/X-Factor! Pull the trigger!!!

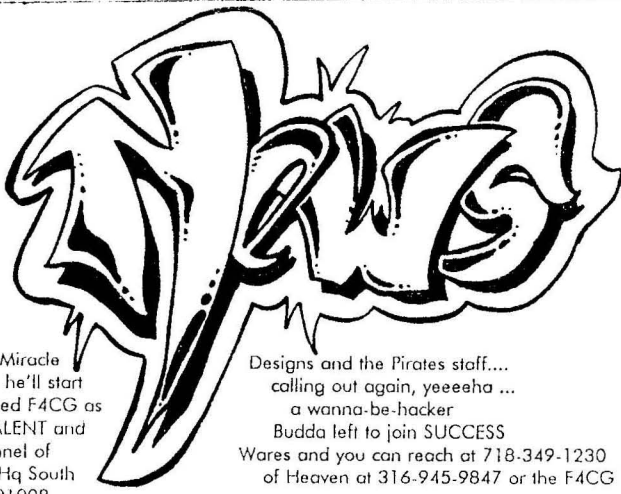

We are all aware of the fact that people like the Pirates... Nevertheless Pyle has a weird way of showing that as you can see. The lucky shoe is ofcoz Solar's...

Return from the Greystoke... This is SID/F4CG.. There is a 1.000 \$ reward for any usefull tips as this picture was the last sign of life from him....

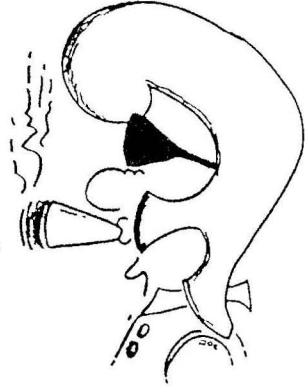

## F4CG

- Scorpie re-joined F4CG, Miracle
- Kid also re-joined F4CG, he'll start
- Ackshun (ex-Mission) joined F4CG as
- Communist left to join TALENT and
- The new F4CG Hq is Tunnel of  
Also call the F4CG + NEI Hq South  
Paradise' at ++32/91/801008....
- Sodium and Newstyle got kicked out of the group for being inactive....
- Sneaper/ex-WOW joined as cracker and coder ... Also joined Mirade Designs...
- SID is back in the scene after a few months break as he had to move to a new place twice  
and had to wait for his phone-line to get re-installed...
- Bitman joined as an Italian original supplier.

Designs and the Pirates staff....  
calling out again, yeeeha ...  
a wanna-be-hacker  
Budda left to join SUCCESS  
Wares and you can reach at 718-349-1230  
of Heaven at 316-945-9847 or the F4CG Euro Hq 'The Lost

## LEGEND

- Anthrax quit the group and the scene altogether
- Martin Schutzen left Legend and will now start composing for Paradise demo section.
- Skater and Mirage joined legend together with Shockll Funny is that the rumour was  
spread before the announcement and they kept on denying the fact...
- RCS left legend and joined Brutal (doesn't make sense ed.) but according to Pwp he got  
booted out of the group (that makes sense ed.)
- Second to None went down because of hardware problems and lack of interest, the new  
LEGEND Hq is the Shaolin Temple.

## ILLUSION

- Still going strong.....
- DMC left Genetix and joined ILS but after a short period he left them and rejoined GTX
- Baze should've quit ILS and joined Legend as mega swapper (probably as RCS left or got  
kicked ed.) but Narc and Pwp both claim that he was never asked to be in the group.
- Jazzman/ILS Canada got busted for h/p and is charged for 25 violations II among those  
one for phrank calling 911 and the cops (not very smart ed.) It got even covered on TV.

## ARCADÉ

- Jihad left the group (Again ed.) coz he wanted to be more independent (what kinda bullshit  
is that for a reason ed.)
- Tyree left Arcade for 1 or 2 dayz because he had some disagreements with other group members  
and he joined ILS for a while but as RADAR wasn't allowed to join Tyree left ILS again and  
then he rejoined ARCADE (Yoyo germans strike back ed.)
- Then it was Radar's turn to leave the group and he aswell rejoined when Tyree apologized on  
their Hq (According to Radar ed.)
- Rumours go around as ARCADE should've re-cracked a few titles from other groups!!!!  
Such as Nobby the Aardvark prv/GTX, Obicontrol/Enigma, and 12 o'clock/Sierra...  
The Arcade version of Tetrados needed 2 attempts to get fixed properly!! First version was  
fixed by Master Kracker ( according to Arcade ed.) but he denied ever worked on it, then the  
second version was put out by MO/Legend who is now Radar/Arc's worst ennemie II They trade  
with Empire but recently gave games to TSM and AFROS....

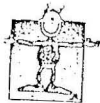

LAME!

Fridayevening (24/4) I got a phonecall from Solar telling me the G\*P party was already the next day. Damned ... I made a quick decision and the next morning at 10.00am Solar picked me up. After a 2 hours trip we arrived in Neuss. There we started asking for Neubrück but no-one seemed to know the place. Lucky for us there was one clever cab-driver who spoke some English and could explain us where to go to. We had to take direction Grevenbroich and we would find it on this road. So, off we went ... after driving around for one hour we still hadn't found it ... Thanks to a local shopkeeper we finally found Neubrück. This village is easy to discribe: 5 houses, 1 church and 1 bar where the party took place. The village only has 23 habitants. Strange part of it was that the village seemed familiar to us ... we probably passed it 10 times without noticing it was Neubrück, we just thought it was a part of another village ... bah ... but we made it.

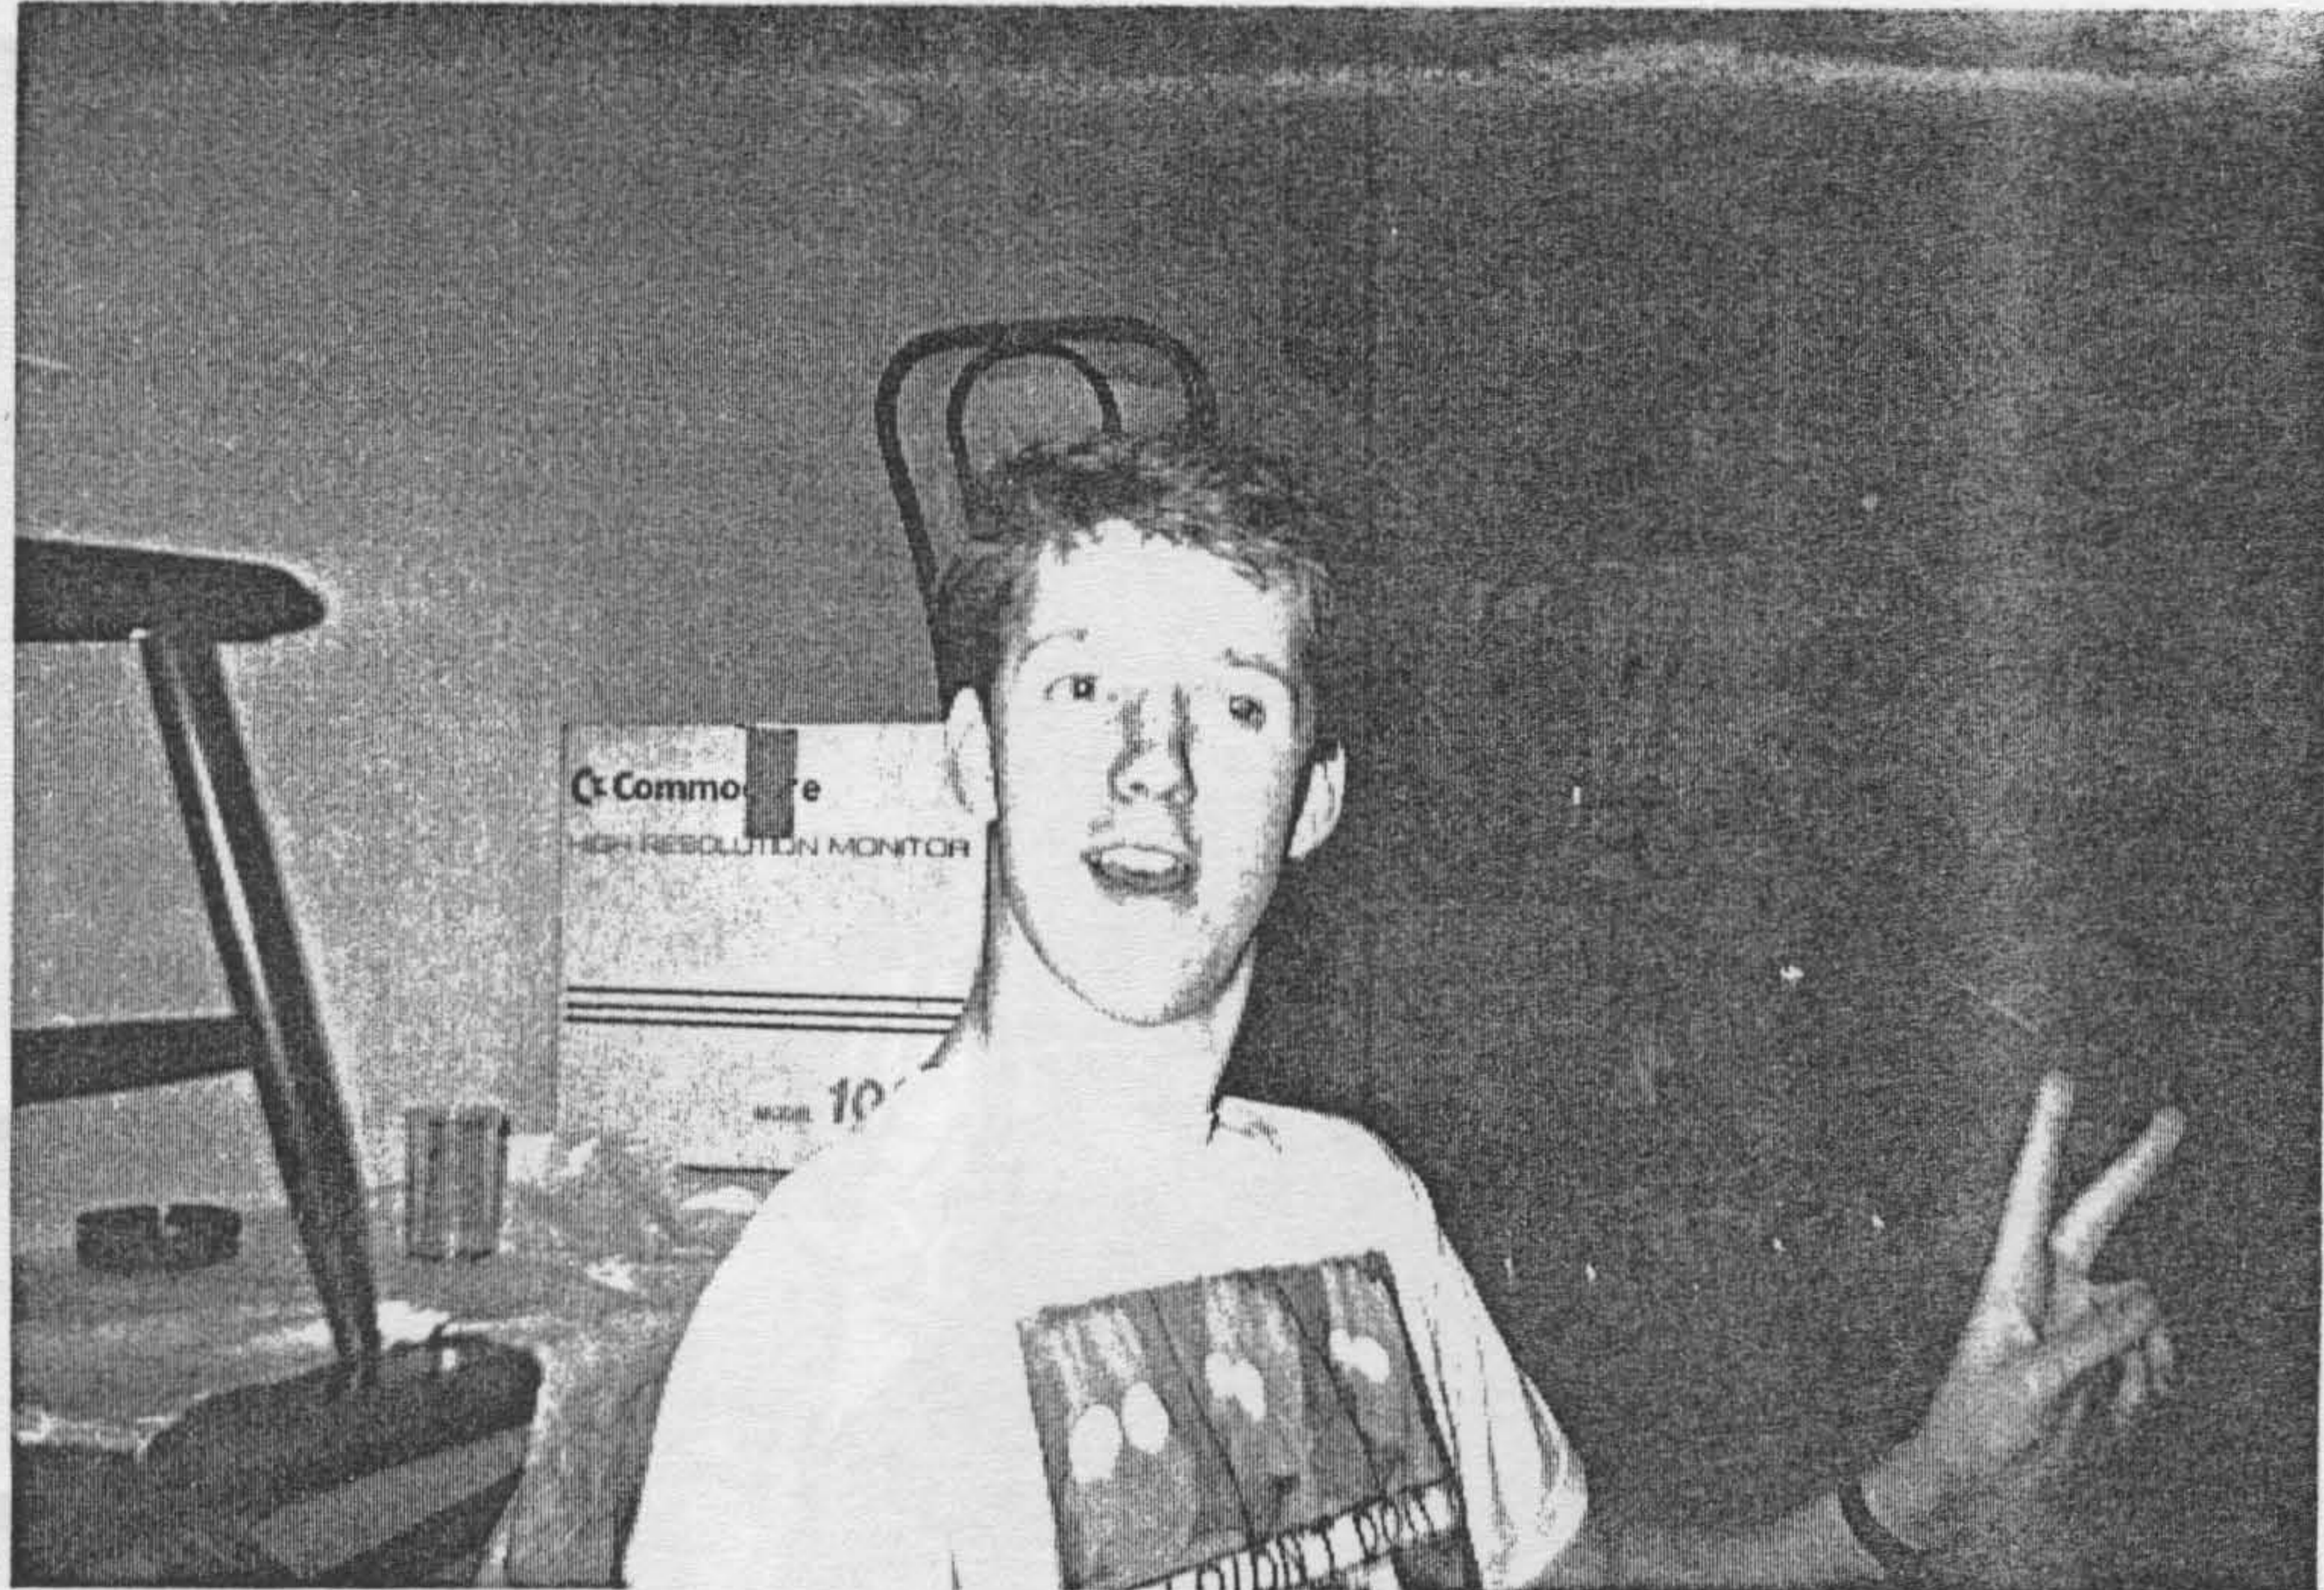

When we entered the place we were shocked ... behind the bar was a hughe hall filled with about 500 freaks ... C64 and Amigas everywhere. Wooooow III

No, just kidding, we got in (without paying - elite never pays, hahahaha ed.) and decided to leave again at the same moment. Behind the bar was a little place with about 40-50 freaks, three C64's and two Amigas III Cool, so we drove 3 hours hoping to find a megaparty and now we got that I?! When we looked around we saw few famous (???) guys. Only 4 of them came to say hello ... Brego/TRIAD, Hi-Lite/SCS, Arrogance/SCS and our own Communist/TALENT. We really got depressed and needed a beer so we went out to grab one in Solar's car ... now we got a strange effect ... most guys in the place followed us. So outside we also met OMG, Pyle, Majesty (bah, wannabe skinhead ed), Scrap and some other nerds. The coolest (???) time we had at the party was outside, near the car with a bottle of good Belgian beer in our hand and BOLT THROWER playing in the background. Suddenly we noticed everyone started to leave ... within less than half'n hour all interesting guys were gone home. What else could we do then got in our car and drive back homewards ??? At the cruise speed of 170-180 km/h (still can't understand how Solar does it with his Citroen Visa I?! ed) the trip only took us 1h 45min. I can't express how we felt when we arrived home ... now when I look back at the G\*P party I can describe it in 3 words .... ONE BIG FAILURE IIIII Beurk ...

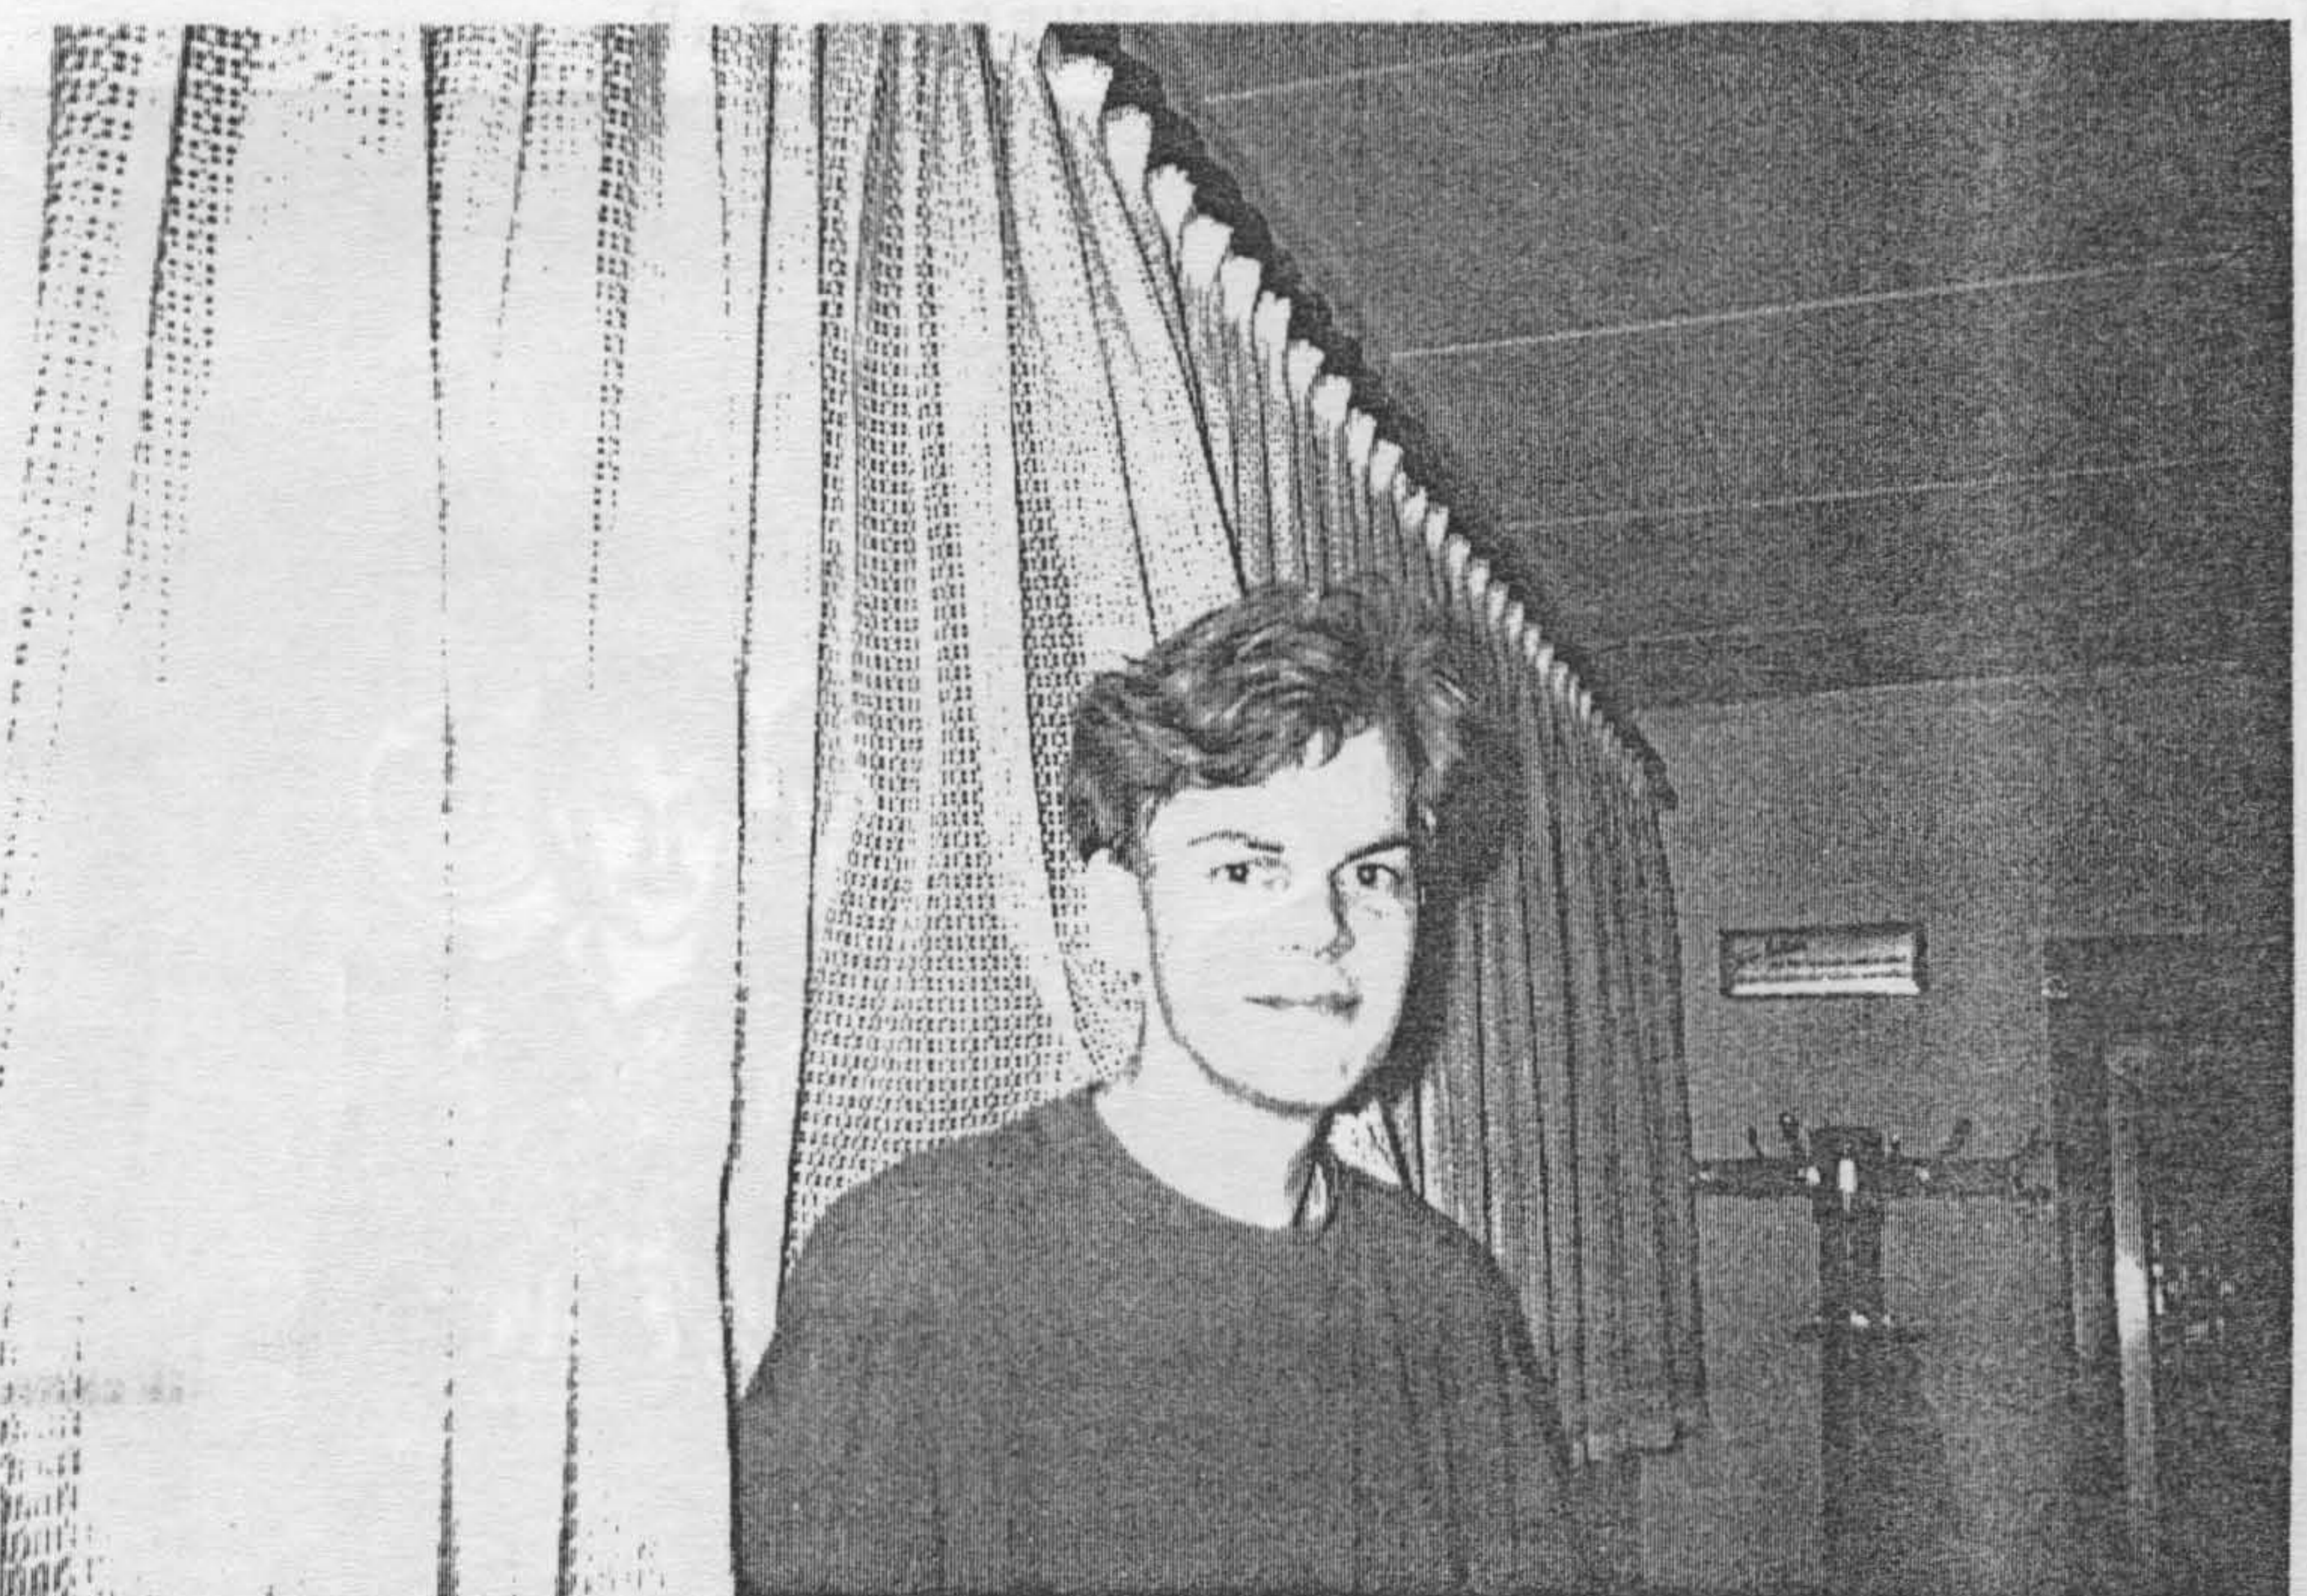

Scorpie / FACG + MD.

The peacefull guy above is the #1 cracker according to Propaganda... Yes its SNACKY/G-P Beneath is TYGER/G-P's girlie..errr Tyger himself!!

# HEADLINERS

- At the moment Hero/ILLUSION is in a hospital in the States ... specialists are doing research on a medicine against baldness so Hero volunteers.
- After the release of PIRATES issue 12, Freestyle/ILLUSION committed suicide throwing himself under a train, Frank/ENIGMA got a job as model for children underwear (United Colors of Brown Tracks)
- Fredrik Blom/PRETZEL LOGIC got beaten up by his kidsister ... she's only 5 III
- Bod/TALENT decided to let grow his hair as he wants to get rid of his 'Mr.Bean' look. Think it will be hard to see the difference between Goldfish/LEGEND and Bod afterwards. Bah, hippies ...
- Deadshot was shot dead by his brother (the cop) when this last one saw Deadshot was using his ATNI card to call out with and that is the real reason for him quitting the scene.
- Derbyshire Ram/ILLUSION is not only doing illegal activities on the C64, it turned out that he is the new Godfather of the British Mob ...
- Ninja's Ferrari was reduced to matchbox size after hitting Solar/F4CG's Citroen Visa (Tonic), quite a crash. Covered by national news and frontpage in TIME-magazine....
- Aycee/TSM's house seems to be haunted ... a poltergeist doesn't allow her to sleep. Maybe this explains the voodoo rituals held by Whorceress/GENESIS PROJECT.
- Another one bites the dust ... after Aycee/TSM turned him down, Solar/F4CG became homosexual. A while ago he got turned down by Hobbit/MIRACLE DESIGNS when Hobbit (finally) met a girl. So Solar decided to bring his awfull life to an end; he drove to Paris and jumped off the Eiffeltower. (Don't worry Rainier, we won't miss you. ed.). His 20 best friends (all chickens) attended his funeral.
- After Kid left the scene, he started a new hobby ... hunting ... his first book titled 'Manual: how to hunt using only your car' will be out soon.
- The Italian members decided to change the groupname, rumours say it'll be F4SG (Fantastic Four Spagethi Group) or F4PG (Fantastic Four Pizza Group)
- Kid and Ninja became V.I.P. in a local dancing called Carre ... V.I.P. stands for Very Irritating People.
- Two new groups got formed in the scene and they are already in big war with eachother.. It concerns NWA (No Wankers Allowed) and WOPA (Wankers On The Phone Association)...
- Jack Daniels/Dom and Deff/Dom left for the States to join a mormon community...
- Goldrush left Crest... the other members wanted to do Blowjob VI and asked Goldrush to do all the text as usual. His girlfriend gave him the choice .. a blowjob or herself...
- Go and see Alien III featuring Psycho/Censor as the Alien..
- Massive Onslaught (recently also known as Massive Glasses ed.) decided to quit the scene as he was too busy calling local sex-lines and had no time left for the scene....
- Nightmare on Pepperidge Road II Thor/Rejects had to be removed from his couch with a hoisting crane coz he stayed in it for the past 18 years watching his idols on WWF .. Rumours are that he features in the BLOB II....
- Radar's mom started calling the boards as her son's phonenumber is always busy and there's no other way of reaching him... So the only way was to call the boards herself and leave him mail...
- Bod/Talent's dick got stuck in his zipper and had to be amputated... Certain people declare that the difference won't be noticable anyhow... ( I wonder how they know ed.)

# INTERVIEW

P : Pirates  
Z : Zodiac

- P : Hi Zodiac ... most people know you as the mega coder from Flash Inc.  
but could you give the people out there some more personal info about yourself???
- Z : Name : Frederik Karlsson... Handle : Zodiac... Group : Flash Inc...  
Born : 740330... Height : 180 cm (5'9 ft ed.).. Brown hair... Blue eyes..  
Unfortunately I'm studying mathematics,physics,chemistry and that stuff in school so i don't have so much time for coding anylonger...
- P : Maybe a difficult question, but i think a lot of people would like to know how you coders keep on finding these new routines...
- Z : Hmm... The competition between different groups simply forces us to come up with new ideas.. Sometimes i get ideas from my groupmates, sometimes from Amiga-Demos, sometimes i combinate and improve old ideas or sometimes the ideas just turn up in my head...
- P : Did you learn to code by yourself or did you get some help from other people??
- Z : Well i learned to code myself coz in the first 1.5 years of my computer life i didn't know any other coders... I bought some books and mags and learned BASIC and MACHINE LANGUAGE..
- P : With whom do you like to work (coders-gfx-music) and why???
- Z : I prefer doing all coding myself otherwise there will always be misunderstandings and other problems. MOON/FHl is always doing music for me. He's always sending too fucking late but i enjoy our weird conversations (doing phone-sex aswell.. For further info contact BOD/Talent ed.) and his melodious tunes.  
Our cooperation also works well when we're developing new cruel music-routs..  
When it comes to grafix i use to work with Morpheus,Creeper and Redstar/Logic..  
Always cool gfx in timellll
- P : What's your opinion of the scene nowadays...????
- Z : The scene is totally lame but there are still some cool demo-groups left. There are hardly no real hackers left (What about us .. hahaha ed.) Too many 13-year-old-lamer-kids...  
All the old hackers who understood what the scene is about are gone ( Sad but very True ed.) like Horizon,Bones,Upfront etc...  
There are only big-mouthed lamers ( who can't even code,paint,compose or run a mag) complain about everything, eventhough they can't do shit themselves  
(True again.. Damn you should run 4 President ed.)  
Too many worthless disc-mags, 5 elite mags are enough (Even 1 Pirates is enough ed.)  
Make a demo or a game instead...
- P : Any hobbies besides working on your 64???
- Z : Yeah, too many hobbies.... I havent got the time to sleep anymore... Daytime I'm playing tennis and Mah-Jong (an incredible funny old Chinese game) The nights i spend in my garden watching stars through my telescope (he meant his glasses ed.) Besides that i'm also studying like hell and i've just taken my driver's licence... Besides that i'm also watching MTV too much (sound like Ninja ed.)
- P : Now we come to the silly part, but people wanna know ....
- Z : Favorite Game : computer game - Populous (me too ed.) real game - Mah Jong  
Favorite Demo : Hmmm maybe MIXER/UPFRONT  
Favorite Music : KLF,U96,Pet Shop Boys,Bryan Adams,OMD,Roxette,Guns'n Roses, Metallica (better ed.), Scorpions,Alphaville etc.....  
Favorite Food : Pizza (I had one 30 mins ago)  
Favorite Drink : Coffee.. ( i drink 10 cups a day to stay awake)  
Favorite Girl : Hmmm, maybe Kristiane Backer on MTV  
Favorite Car : SAAB 9000 (The great Swedish car...)
- P : You're a very good coder, you create demo's but what about games???
- Z : I, Moon and Redstar are producing games under our game-producing-label OCTABITS.. The first one is called 'Psychic Chaos' and was sold to Double Density 10 months ago... Check it out, its

great !!!

Soon we'll have finished our second game called 'Funball'....

I don't know if we can help the 64 to stay alive. Nobody is interested in bying games for the C64 anylonger ... Fuck AMIGA (Hmm you must be contacting the wrong companies i guess ed.)

P : Ever been in trouble with the Police????

Z : No, no special problems but once a police-car drove straight into our SAAB when they were hunting some thieves.. Only some scrap metal left .. (Thats why u didn't wanna send a photo of you ?? ed.)

P : Who are your best friends in the scene????

Z : All the Flash Inc-ers...Especially Moon,Morpheus,Unifier and Redstar/Logic..

P : When you hear the following words, what comes up in your mind???

Z : Panoramic Designs : Homoboys

Flash Inc : The pride of Sweden (don't be modest .. please.. ed.)

Crept : Disc-error

Lamer : All these lame disk-mags...

Pirates : Cool! Send it to me!!!

Crest : \$D011

Redstar : Cool pictures... Game producing

Dycp : Myself .. 2 years ago

P : What projects are you guyz working on for the moment ?????

Z : A summer-demo, more games, more HOTSHOT-issues....

P : Ok thanx for this interview... If you still have something you want to add (like greets,fuckings, statements, .....) feel free to do so now.....

Z : Thanx for interviewing me... You should be happy to get this interview coz this is the first time i've ever answered an interview (you couldn't resist for such a cool mag, could you ???? ed.)

Stay on the 64 forever... Sweden rules Ice-hockey...

## Swimming suit report

I must admit that i'm kinda amazed by the result... I figured getting less pictures for this topic... Well i was right and wrong... I got alot of pictures spontaneously from the girls but too bad not in swimming suit.... Too bad.... Still its cool to see the girlies from scene people or ones that are active in the scene !!!! You can expect some more in the next issue of the Pirates ( oohohohoh planning in advance is always bad ed.) Well most normal scene people got reviewed etc... in other issues of our or other mags so we decided to cover the girls for a change... after all they're the most important thing in our lives... Well at least for me... !!! And not to worry if we run outta girlies to show we can always start with the parents, grand parents, pets... Hahahah that'd be a blast ... See , them from the Pirates-staff never run outta idea's do they.... Also notice that the staff is not responsible for certain people starting to WANK and cream over certain photo's... they can not be exchanged for new copies... ( so you better laminate them again Dan'n ed.) let the madness begin....

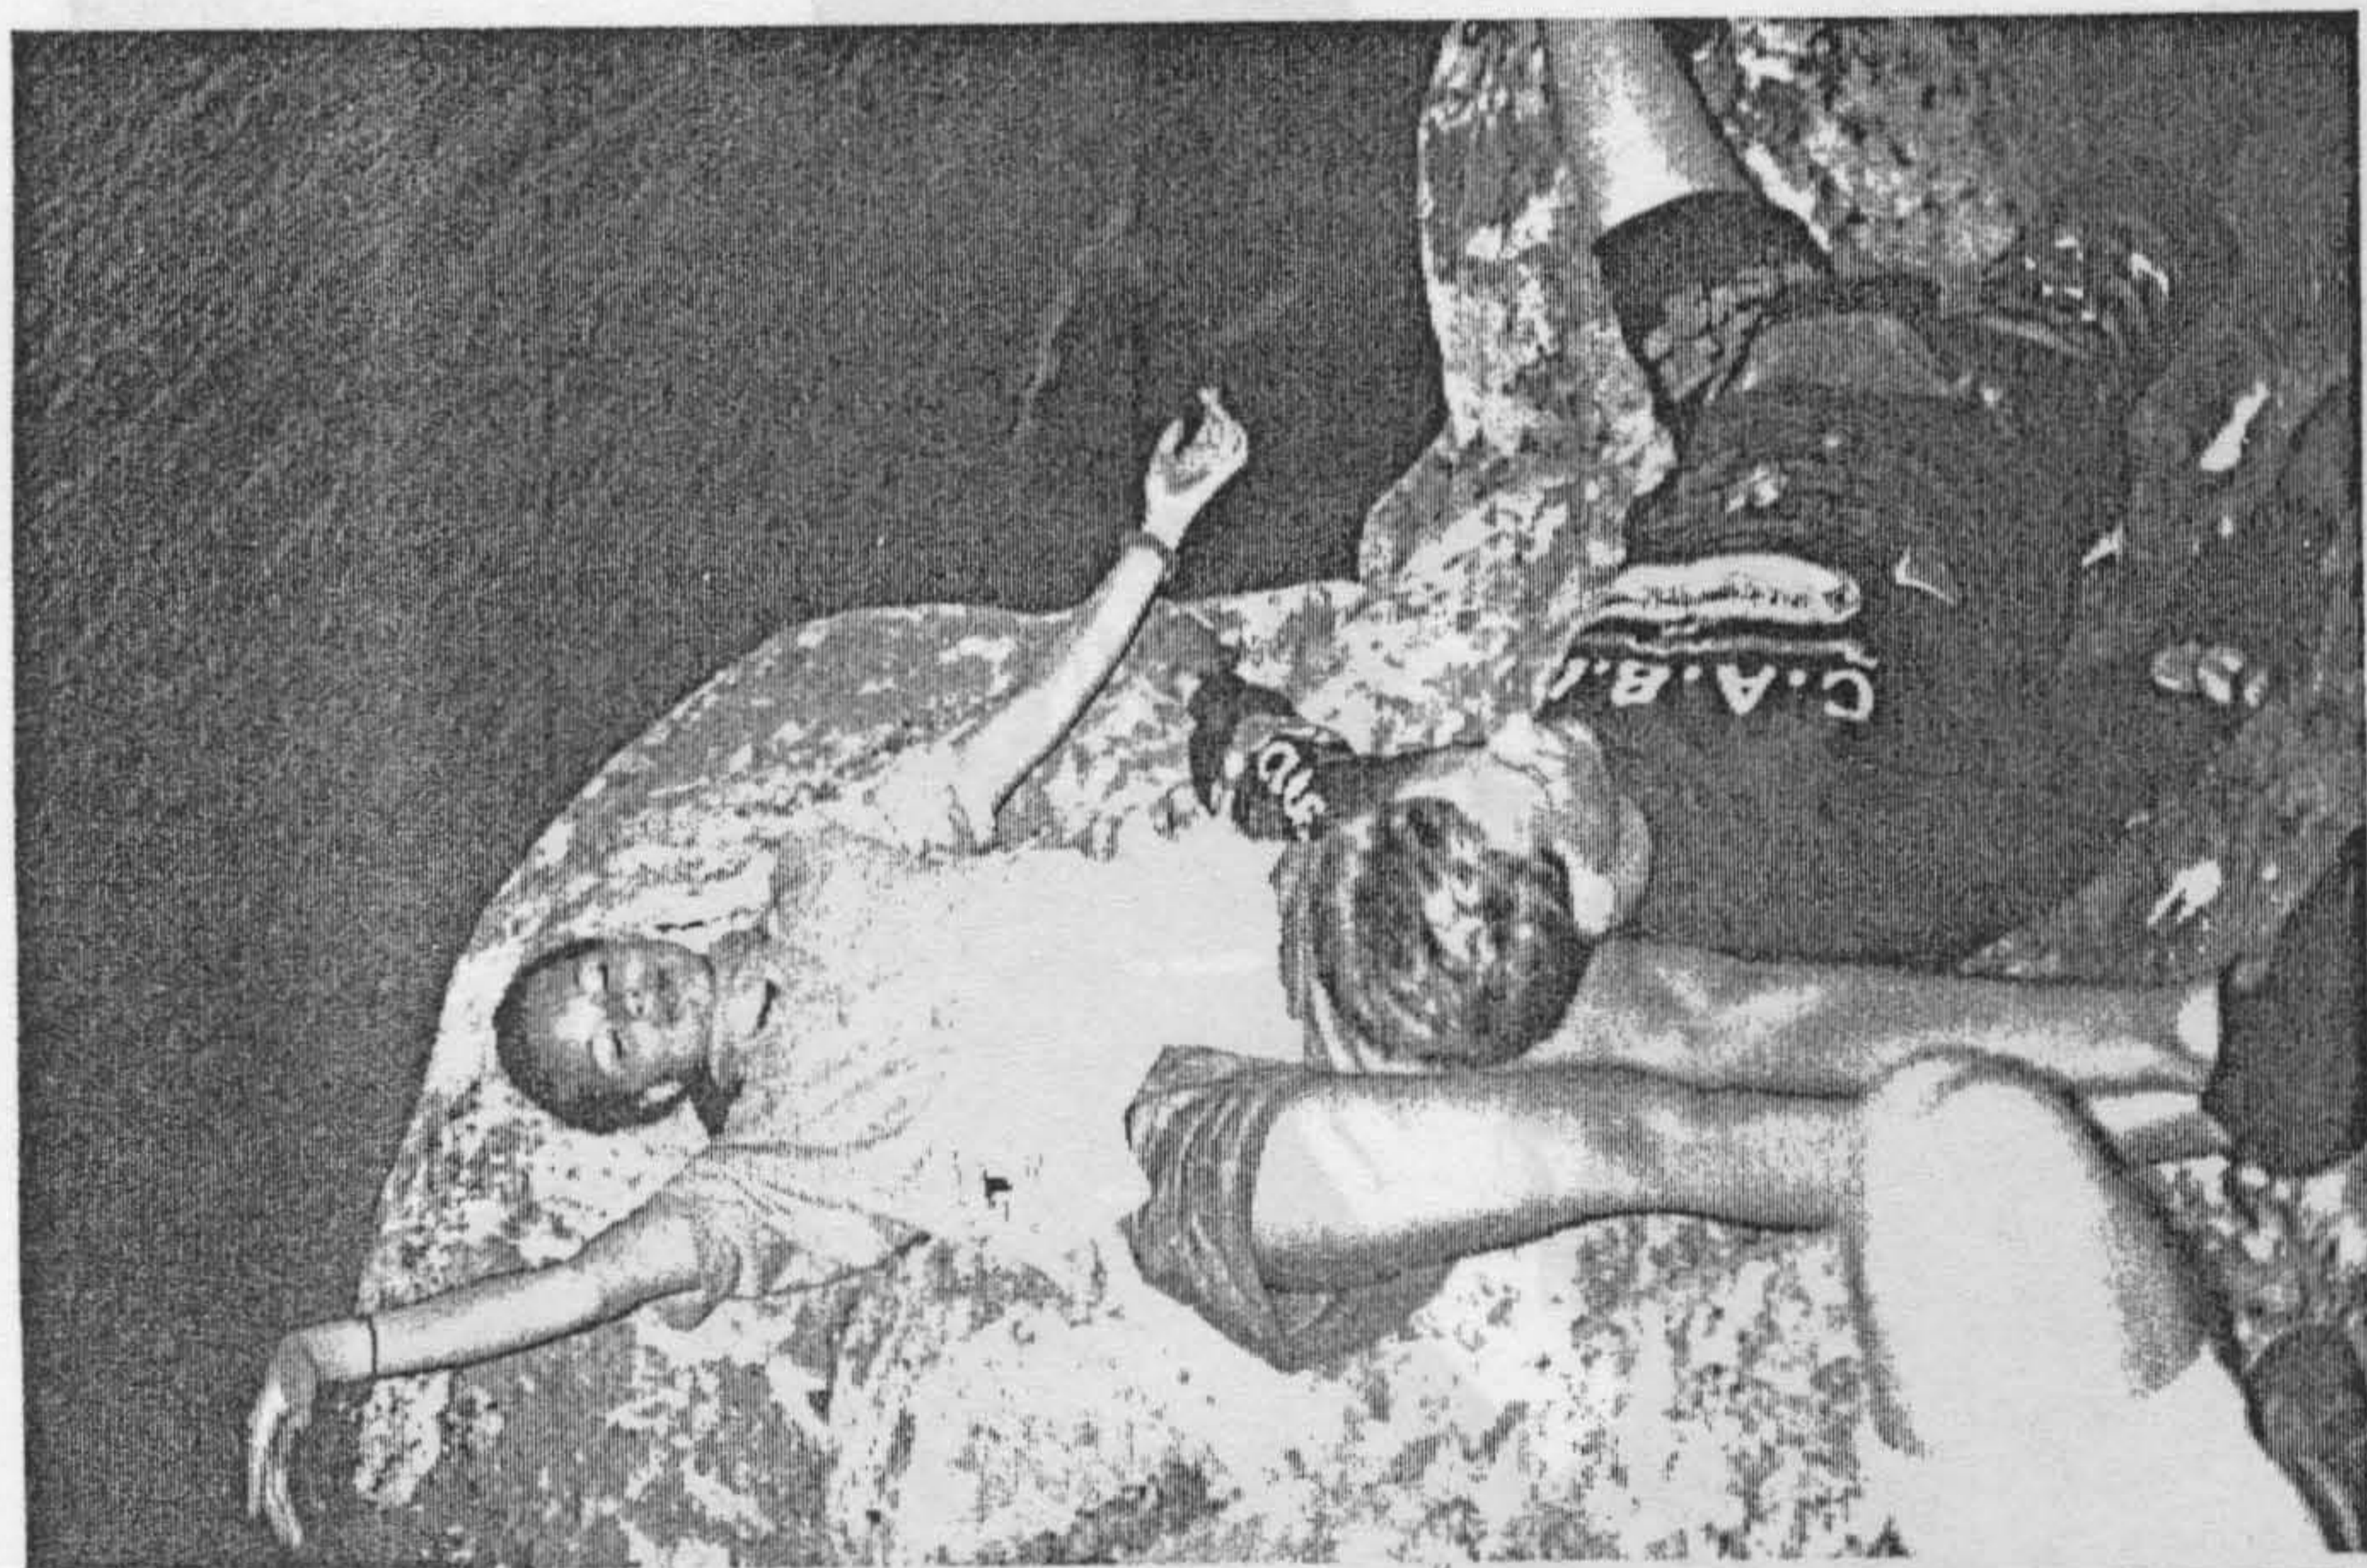

The beauty (???)  
that tries to hide

Nickname: well, most people know me as Scorpie; in my village lotsa guys call me Scorpie.  
I even have to thank some of them for this handle.

Group: F4CG (the place to be, eh Solar ?? ed.) and MIRACLE DESIGNS, I've been in lotsa cool groups but none of them beats F4CG III

Function: most of the time trying to beat Solar in lazyness, next to that I take care of the organisation in F4CG (a part of it) and MIRACLE DESIGNS. I do some lame graphix and swap a bit with those I consider to be my friends and last but not least I am the main(hahahaha)editor of PIRATES.

Nationality: Belgian, but who cares ???

Age: on 27/03/'92 i became 23 years old, and I am one of the oldest F4CG members.

Sex: that's what we all like, eh I?!

Computer: C64 and Amiga

Hobbies: peddling around in my kayak and teaching this sport to others, I used to play volleyball, I did some working out (look at PIRATES issue 12) and my computer.

Personal slogan: you don't like me the way I am ... FUCK YOU III

Most disliked people: those brainless idiots who support apartheid, fascism, nationalism and who can't see all humans are equal no matter what skincolor or religion they have.

Favourite drink: Filliers Apple Jenever

food: chicken + fries and salade

music: speed, thrash, doom, deathmetal, hard and grindcore

film: Kickboxer (with JC Van Damme) and Terminator II

games: Secret of Monkey Island (Amiga) and Farmers' daughter (C64)

Political position: left

Greatest experience: waking up at the operationtable while being operated at my foot.

Biggest dissapointment: getting to know Solar, hahaha... No, I try to forget my dissapointments so I won't state one.

Best friends in the scene: Solar, Ninja and Kid (a pity you guys left), Stad/F4CG, Electric/EXTEND, Hobbit, Derbyshire Ram/ILS, Fredrik Blom, The Wim/ARGUS PRODUCTIONS,Goldrush/CREST.

Future Projects: doing some more computer games, for the rest we'll see what this fuckin'life will bring us ...

Demoreview : BRUTALITY 100% / LIGHT.

A while ago Solar/F4CG called me up and asked if I wanted to do the review on the newest LIGHT demo for PIRATES. Well, why not, I've always been a LIGHT-fan. So he send me the parts by modem. When I look at the disk I only see three parts I? I call up Solar but he's out for a beer. Bah ... anyway, I decide to do what I was asked to do (ofcoz you did ed.). I load the first part and get to see the same intro as on the BRUTALITY preview which was spread at the BONZAI party ... RESET.

Looking at the directory I notice the second part is only 13 blocks ... strange for a demopart. The name's BOBMANIA/TROX and this name surely fits ... running the part results in a black screen which is being filled by millions of bobs ... cool code, but there is still a lot of work to be done II

Finally there is the third part to be checked ... after running a text appears on the screen. This part includes a realtime raytracer and according to the LIGHTers:"it's one of the most spectacular demoparts ever in the history of the Commodore 64". Let's see ...

Not bad at all, the part is coded by Yabba and contains music, simple but cool, by Bluez.

Wowsa ... the way the scroll and other objects reflect in the central ball is fantastic II

Good code III Well I'm sure when these parts will be linked to the rest of the BRUTALITY demo lotsa eyes will be opened fuckin'wide III (Watch the language ed.)

Scorpie / F4CG+MD.

Partyreport : BRUTAL party, 26/06-29/06/92.

We drove at 2am on 26/06 from Hannover over Flensburg to Hov from where we took a ferry to Sammo. It took us 1 hour and 20 minutes to reach the island. There was a bus that brought us to the partyplace. There were two big halls, one for C64, the other for Amiga. Some groups were in classrooms. The C64's were in a gymnastic hall. The entrance was around 40 DM which was a bit expensive, I think. In the hall was a very big screen where the demos were shown and also the final of the Euro Championship Soccer. The quality of that screen was very bad. They sold also some bottles of softdrinks and something to eat, but selling these drinks was not successfull as a bottle of Coke costed about 9 DM. Near the partyplace was also a soccerfield.

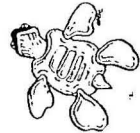

The demos were shown on Sunday in the evening ... result:

1. Horizon

2. Censor Design

Unfortunately, the Brutal guys didn't pay the promised amount of money to the winners, but Censor got their 6000Dkr. for their second place as they wanted to kick the organisations' ass if they didn't pay them.

Some of the guys present at the party were: Communist/TAL, Mac/GBF/CREST, Brego/TRIAD, Maduplex and Drax/CREST, Sensei, Psycho, Bob, Dragon/CENSOR and some HYSTERIC, CAMELOT, X-FACTOR, HORIZON, FLASH INC., DOMINATORS, ... guys.

Communist / Talent

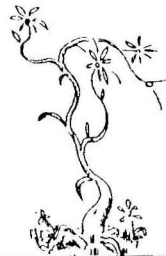

Partyreport : Hildesheim party, 13/06-14/06.

The party took place in two small rooms of a house which was owned by the village. Party-entrance was 5 DM. There were no competitions, it was a meeting for boozing only. There were only 40 guys but they all were in a good mood. Later in the evening some low-lives of the village tried to attack TCH/BRUTAL because he was a foreigner, but all partydudes helped him out, called the police but the low-lives went away before the police arrived. The only damaged thing was a window which got destroyed by a thrown stone. When all was arranged there was only boozing and having fun in the place.

All in all the party was cool, rating 7 out of 10.

Presented dudes: Communist/TAL, TCH/BRUTAL, losta HYSTERIC guys, Brego/TRIAD, Parson, Tyree, Starkiller, Twin/MDG, A-Man and lotsa others.

### How dangerous is Blue Boxing ????

Well it can be said that BB'n isn't dangerous at all, but exceptions confirm the rule.

To show my sources i wanna point out that i'm sine 5 1/2 years employed at the German post/Telekom in Frankfurt as an alactronic engineer and due to that prefer to stay annonymus... I posses an Amigaz 3000 ands am engaged since 7 years with things like Phreaking... BB is probably the (untill now) most known and the most spread way to double cross the post. Ofcoz nobody likes to be defrauded with such enormous amounts of money. Contrary to the common opinion that the German post doesn't substain, she takes higher suffer. AT&T e.g. pays the occured cost onmy partly, because they deomand from the German post to install frequency filters which prevent the sending of unusual frequencies, which are only supposed to be used by telephone companies; whilst already filter these signals at the competent telephone central.

The post got some ideas for that ofcoz, because this claim seems to be impossible from AT&T's side. As in Germany more and more digital nets are installed, the post mainly supervises these lines. A system which was especially invented for that aim by engineers from Franfurt to control the actions of BB'ers. As usual with the digital net all calls from digital phonenet users are saved and approx 30 sec. after the call recorded. Besides the number of the one who gets the call, date and lenght of the conversation are getting registrated... The post keeps the retrieved data for more then 2 months so they can back trace eventual disturbances or complaints from the owner of the toll-free numbers. The 'Netcheck4 called system checks at the end of your monthly phone-bill, aprox 1-2 weeks before the bill arrives at the users house, thein that time done phone calls. If the amount of monthly called toll-free numbers overrates a certain limit (about 30-40 tollfree calls) then it's enough. After another month of being controlled, they exmanine the recorded cuts from your calls for not by German system used frq's. With that the phreakers are already supervised by the Telekom and after 3-4 months the Telekom's Hq for telecommunications charges gets the instruction to fix a phone bill due to the recorded data's of time,phonecall recived location and lenght of the connection, which will be enclosed with the monthly phonebill... Its planned to analyse and exploit the recorded signals in the recorded 30 sec's of your phonecall. If the post proved that you dialed e.g. from Germany to GRreece and from there to the States, then both calls are added to the bill in full lenght. Indeed summo,s to that must come from the companies of the corresponding countries. Wit hthe here stated example the phonebill would be (after 4 months with 1 hour daily BB ) about 20.000 DM which has to be payed under threat of a punishment by law. Eventually it is intentional and repetitive fraud. Of course there are only frontiers of your phone-bill due to your phreaking activities.. That i pointed out at the beginning of this article that BB isn't dangerous is because the digital phone-net is only in certain area's completely installed. Anyway eveybody who is digital connected can easily recognize if they may BB or not. Ofcoz its also possible to be caught whithin an analog phone-net, but the possibility iof getting caught is 1/100 except being denounced by somebody, but nobody is 100% save of that.

Digital phone-net test :

- Tones when you pick up the phone
- Tones when dialing
- Possibility to dial with so-called 'dialers'
- When a line is busy, yours will disconnect after a while too
- good, line-noise free connections

Mostly you can also get info about digital phone-net areas and numbers at the local Telekom department. If only the last 2 points occure with your phone its possible you are only connected to a digital central but not fully digital. In that case you should unconditional pay attention when your phone is fully integrated in the digital phone-net. The post thinks that they will catch about 1.500 phreakers in computer surroundings (mainly IBM & AMIGA) untill december '92. When we sum up our very low estimated calculations, coz who amuses himself only 1 hour/day in foreign countries, the Telekom gets a total amount of about 30.000.000 DM. Who wouldn't understand that they try with all possible means to stop those who cause the money lackness. A call from Hannover to Frankfurt costs after 6pm around 20 DM/hour. And if you call to the States you get charges of 300 DM/h. So here's my hint. BB - OK, but not with a digital phone-net, coz it can take more then 1/4 year and more untill you recieve your massive phone-bill and untill that the phone-bill will be really MASSIVE.

Interview: Flamingo / LIGHT.

P: Pirates

F: Flamingo / Light.

P: Ok, first some data about yourself, please ...

F: My real name is Oscar Stahl and I am 17 years old (born 16/12/74), I'm about 1.75m tall and I weigh 64kg. I live in Saltsjbaden where I still have one year left in school.

P: When did you get into the scene ?

F: Well, I got my C64 as a gift for my 12 years birthday in '86. I started coding in the beginning of '88. My first group was called Micro Service which I had formed together with some local friends (including Waco). In December '88 I joined Triad for a very short while as I joined Light in January '89 and I've been there ever since. I've also been a member of Agile as all in Light joined Agile as 'Light of Agile' in March '89 (for three months). We also were in coop with Fairlight in the summer of '90. Luckily only for five days as we understood our mistake 'fairly' fast.

P: You are without doubt one of Europe's top coders, perhaps the top coder. But what do you think about other coders ?

F: Well, coders I think who are doing a great job are for example Yabba and Waco in Light, they are really good. The Horizon guys, the Origo guys and also Beyond Force and Crossbow a bit. But I think that people really vote strange. I can't for my life understand how people like Walt/ex-Bonzai and SES/G\*P can get into charts ... and Olav/Panolamic. You can't hardly even call him a coder !!!

P: Well, now some favourites (to cool down I suppose ... ed):

F: Food: junkfood

Drink: Coke, milk, beer

Movie: the Star Wars trilogy

Book: Shogun (James Clavell)

Music: Dire Straits, Bowie, G'n'R.

P: And in the scene ?

F: Group: except for Light, I guess it's Horizon

Coder: Kjer, Boogaloo and Exilon/Horizon and Yabba and Waco/Light

Musician: Danko, Skyline Technics, Bappalander/Light and Jeroen Tel.

Grafician: Hein Design, Sensei/CD and Goblin/Light, he does a lot of very cool grafix for my parts.

P: What do you think about today's scene ?

F: A bit dull, too much people quitting and not so many real good coders.

P: Aha... well, what do you do in your sparetime, when you're not computing ?

F: I do those things most do like homework and watching TV. I hang around a lot with my local pals too. And I visit Goblin quite often, to spend time with him.

P: Now, what projects are you working on at the moment ?

F: Well, Flamingos' greatest hits is under development and I also work on 2 parts to be featured in our next demo, which will be called Brutal 4 - Brutal sucks ...

P: Talking about demos, which is your favourite Light demo ?

F: Brutal 2 and Brutality. Noone of the real Light members liked Brutal 3. It was put together too fast and never got really finished.

P: Do you have any enemies ?

F: No, not really, but I don't like Jerry/Triad.

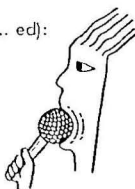

P: What will happen to Light in the future ?

F: Well, Goblin has fixed me and himself cheap Amigas so we're thinking about establishing Light on the Amiga ... time will tell. (too late ... Light already kicks on Amiga ed)

P: Any greetings to your best pals ?

F: Hi Goblin and all in Light (and Jenny). Also hello to all in Horizon.

P: Thanks for the cool interview.

P: Pirates  
B: Derbyshire Ram (Barry)

P: Hello Barry, most people know you as Derbyshire Ram, megaswapper and cracker, former member of Dominators, Deadline, ... This is only a vague discription, please tell us a bit more about yourself (personal and C64 career).

B: Hi Scorpie, well, as you know I am 53 years old so there really could be a lot to talk about but I will keep it as briefly as possible. Well, I am overweight for my height (too much beer and junkfood). I have been married to my wife Ann for 36 years, I have five grown up kids ... two sons and three daughters, all but one daughter are now married (she's 28, any offers ??? - maybe Kid, hahahaha ed.). I also have eight grandchildren (another one is on it's way ... planned for august but Barry didn't let us know yet if it's born or not. ed). I live with my wife and daughter in a large bungalow on the outskirts of Chesterfield on the edge of the Peak District National Park, situated in the dead centre of England. Sadly because of a balance problem I am restricted from travelling any distances, I do own a 'car' of sorts. It is a three wheeler, a 'Reliant Rialto', very nippy, no problem getting 95 mph from it when I am on form.

P: You've been around for quite a while now. What do you think about the actual scene compared to the one of 4-5 years ago ??

B: Well, the scene has changed a lot during the past few years, some for the better, some for the worse. 4-5 years ago the whole atmosphere had a friendly edge to it, slugging was not as prolific as it is now and people in the main were much more approachable. Probably the reason was that there was plenty of software around to crack then and we were less bored. For some unknown reason nowadays almost every group has his 'mouth', I don't know of many exceptions. Too many crackers nowadays want to be famous before they have had a C64 for 3 months but unfortunately most of these guys burn themselves out very early, but better ones tend to stay on course. Overall though, I would say that the quality of cracking 4-5 years ago was far better than at present when you consider the tools that were available then.

P: It's now quite a while since the English Dominators members left the group, but most people still don't know the exact reason for it. Can you help'em out ??

B: Well, for myself, I left them for a number of reasons which accumulated over a six month period. First when I joined Dominators I was honoured to be asked to join such a successful group, this was in March'90. I was asked to either crack and send budget games to Denmark fast or send the orgies to Dogfriend to try to get them up onto the boards. Shortly after I was asked to send my cracks to all Danish members by Express mail for them to spread. I did not send Express, I got very few disks back in return for these and next to no cracks. The other English guys joined Dominators about a month after me, they were all ex-members of 'Twilight Zone'. Between September'90 and July'91 all the Dominators cracks were done in the UK, in other words we held the group together for well over a year. Communications were very bad within the group, Tricket was the then so called leader and though he had plenty of access to phonecalls he rang me 3 times in a whole year and replied to my letters only twice. I obtained all my own originals but NME was payed by the group for originals, he sent these to Denmark and I sent the cracks. In early November'91, I got some slugging phonecalls from some Australian guys who had been offered membership into Dominators by Animal but costing them 25 Dollars to join the group, for some reason two of these guys said they had payed up and were having a go at me because they had seen nothing for their money. After the third call in two days I quit the group, mainly because I did not approve of the kind of approach. Oddly enough three days later I was thrown out of the group !! Regarding the other UK members, well unofficially they had left Dominators before me though I did not know at the time to form DEADLINE, they had kept quiet because NME was still owed money from Dominators for originals (he owed his shop over 100 English £). This never came and Dominators heard about the new group then threw them out.

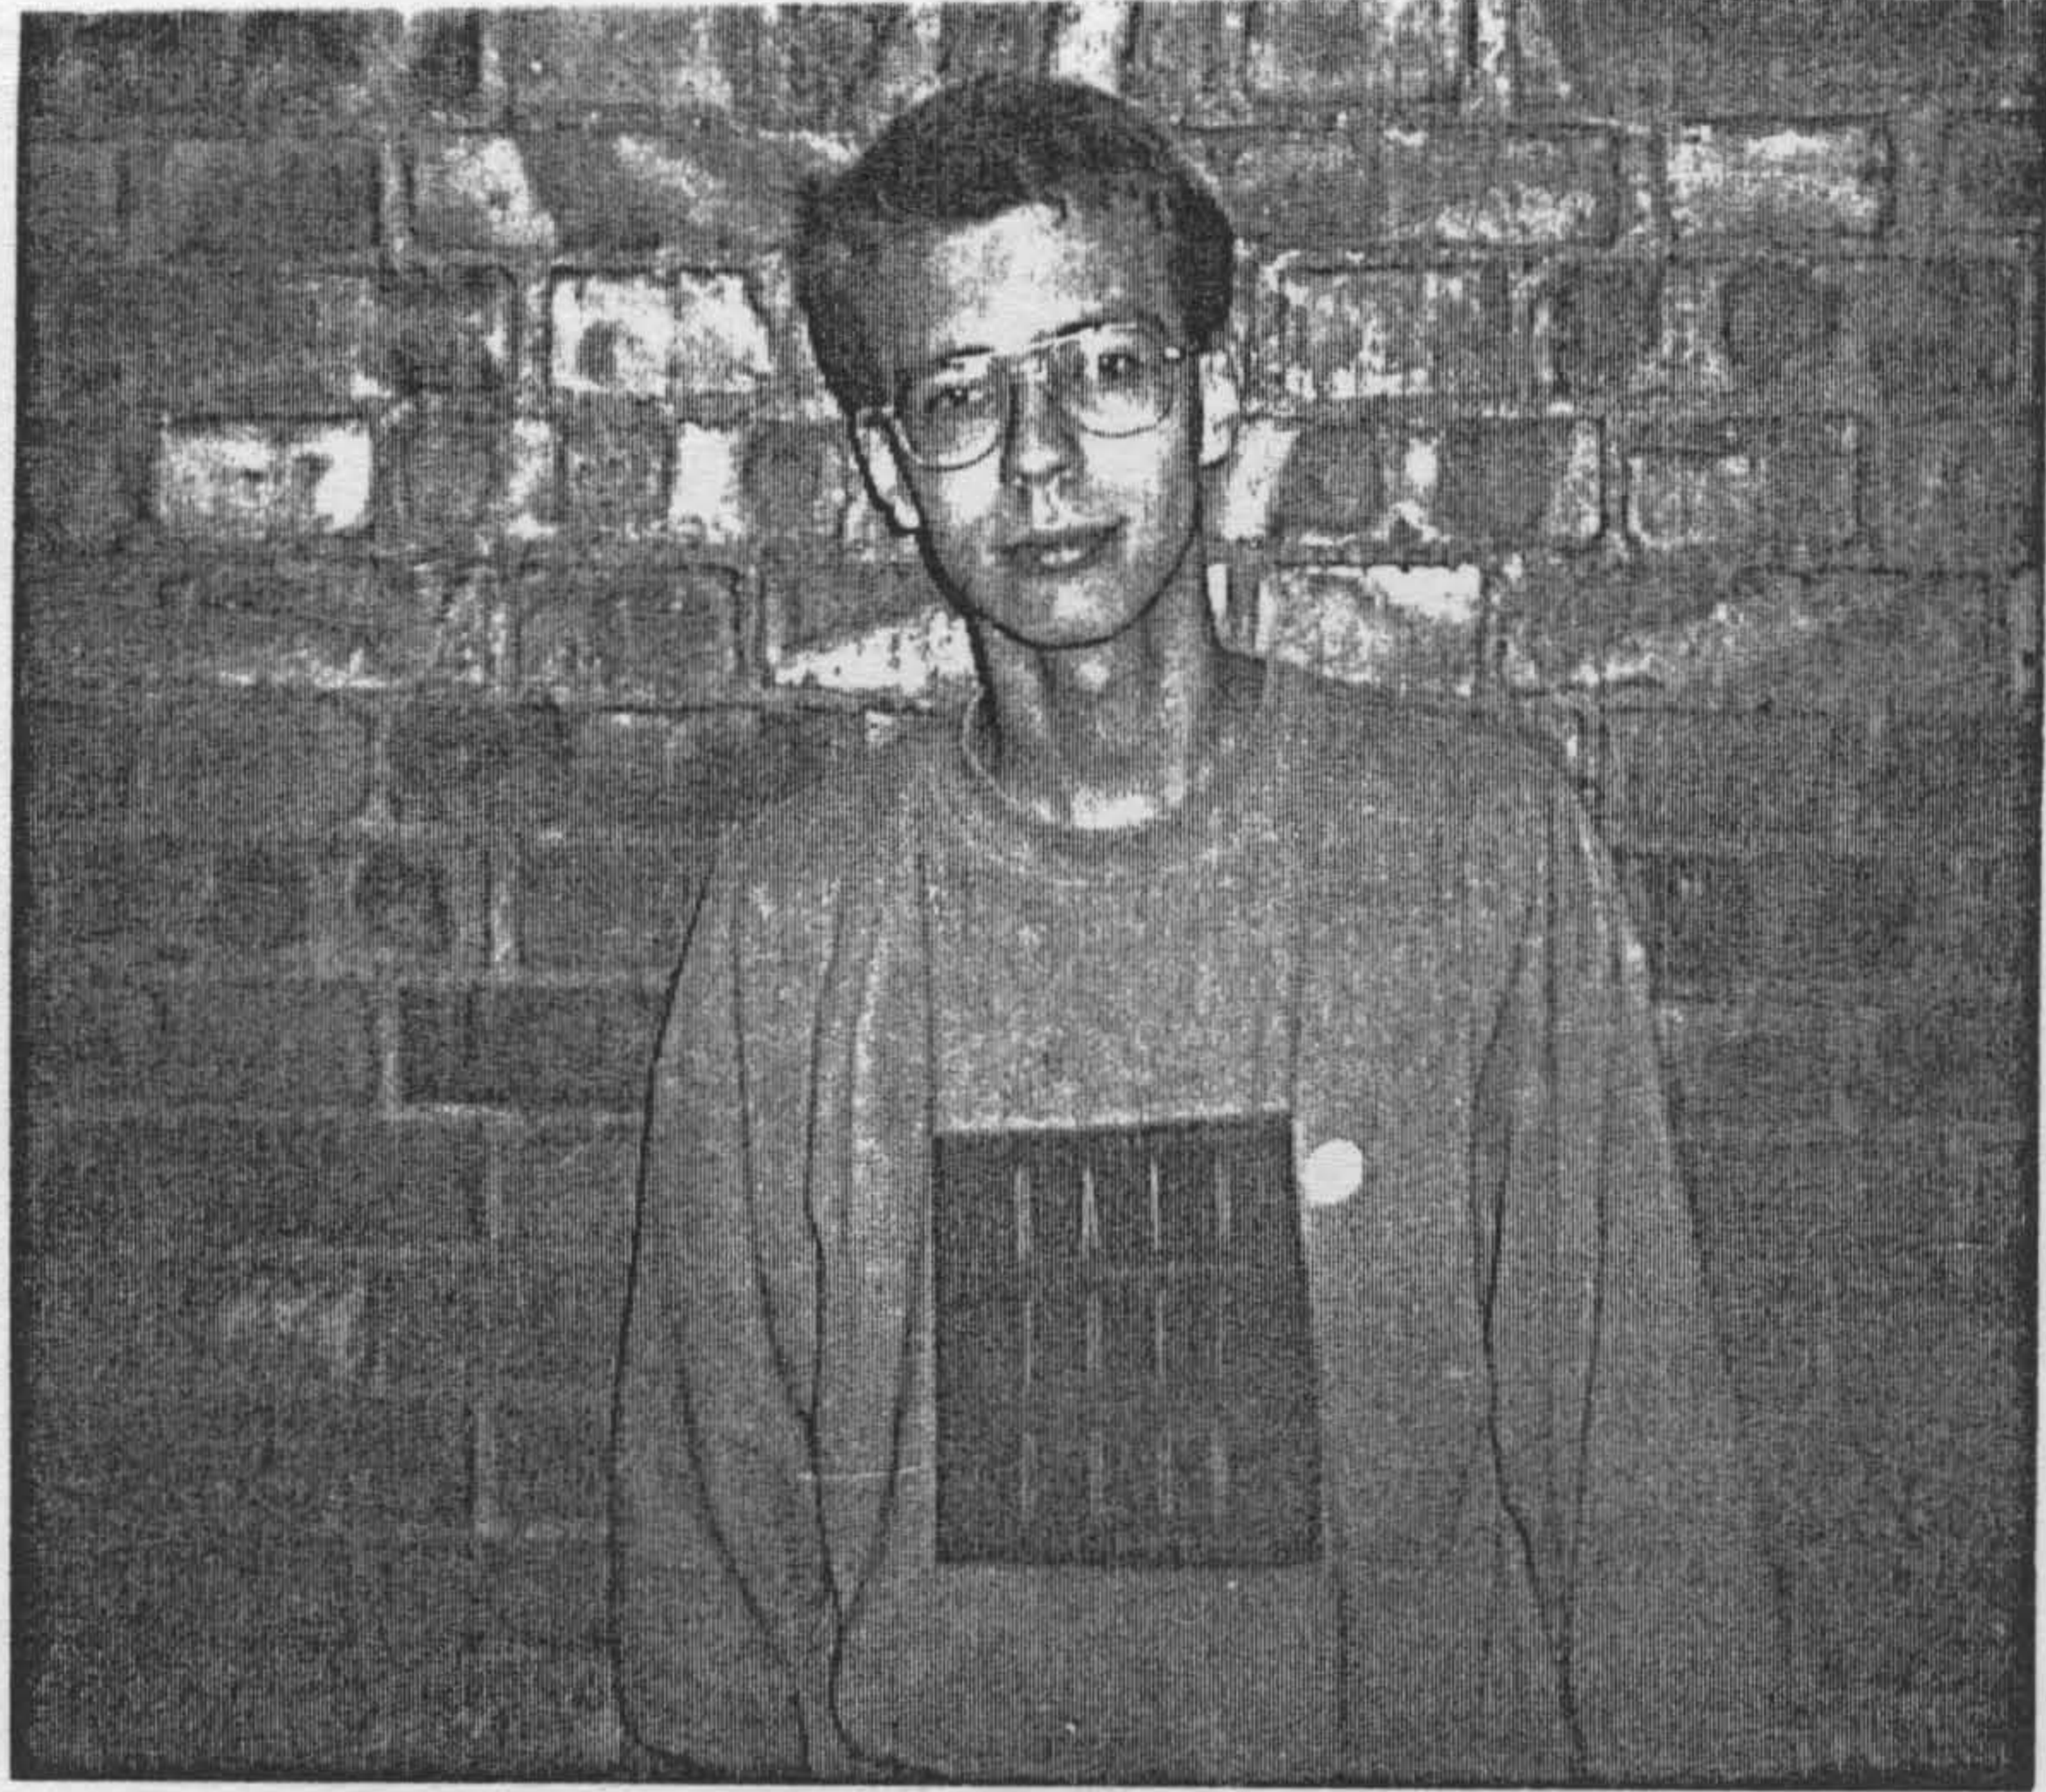

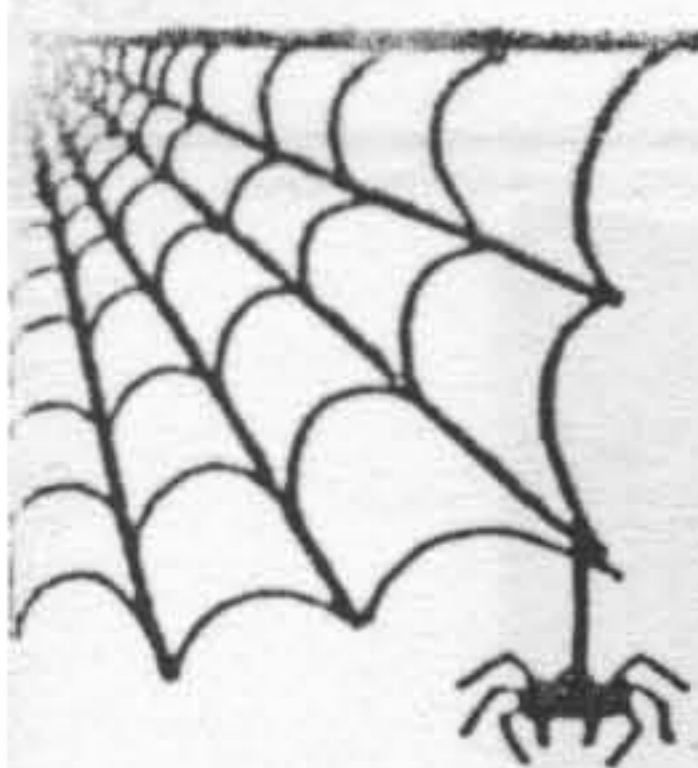

This was the most interesting place at the G-P copy-party.... Da radical guyz from F4CG (Solar+Scorpie) with the car and the free booze.. from left to right ?,OMG/G-P,SCRAP/G-P,HI-LITE/SCS,CRAZE/HYSTERIC,COMMUNIST/F4CG,ARROGANCE/SCS,BREGO/ARCADE,PYLE,???

BARTERER/HYSTERIC  
and FLASH INC

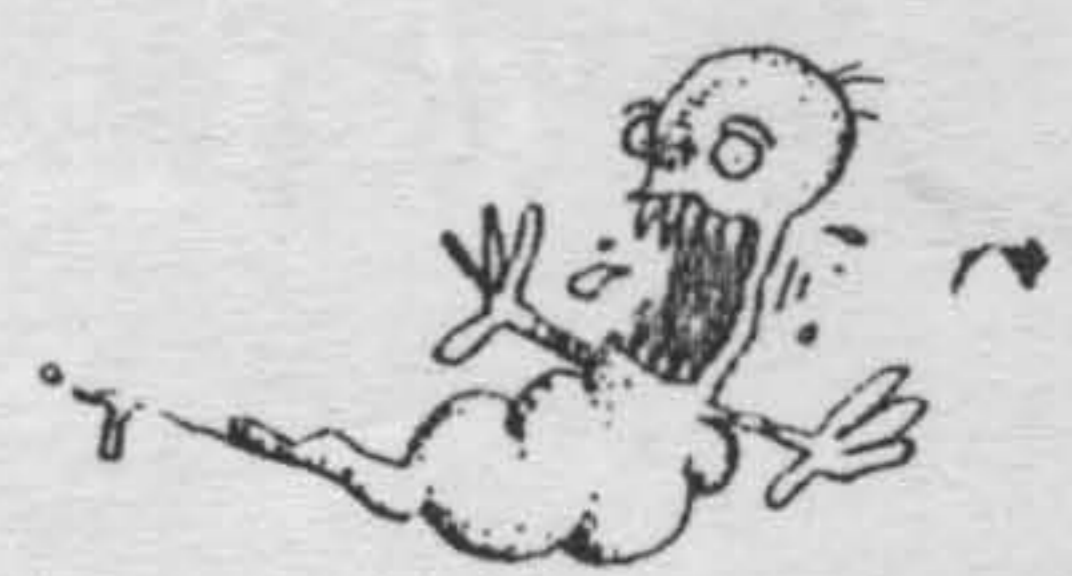

This youngster  
should be  
BACCO/ARCADE

How old are  
you anyhow??

Shit am i getting  
old or are all those  
guyz so fucking  
young.....  
This kid should be  
SCI/ex G-P....

Just to underline these comments I have in my possession a letter from a Danish guy who recently left Dominators because he was asked to pay up 250 DKK or get thrown out, he left and Dominators lost a good spreader. I am not knocking the group in general because I still have good friends in there, but it is time someone took the group in hand.

P: Ok, back in time now, how did you get into the C64 scene? It's hard to believe that someone of your age (no offence ed.) starts to play games; you wanted to become young again ???

B: Well, I got into the C64 scene in late '82 when I was forced to leave work, the C64 was bought originally for my two youngest daughters but I played odd games because I was so bored. I got fed up with the log tape loading games so I decided to try to shorten them using various dubious utilities. I eventually got down to putting them onto the old turbo and thought I had done miracles. I then got odd people writing to me regarding swapping and as everyone knows the knock on effect is enormous. I still kept cracking games just to shorten them and for no other reason. I got my diskdrive and Expert in '85, then things started to move faster but it was not until '88 that I used a terrible little intro in front of my games and released the as 'Derbyshire Ram' cracks. I continued like this with a couple of better intros until I was asked to join Dominators. Maybe I am catching up on things I missed years ago, I don't know, I like what I am doing but I am no real cracker in as far as I do what I do for fun, I crack in the only way I know, I don't bother with multi-loads. I can't do them and someone else always does so in my eyes I am combatting boredom in the way I like best.

P: Now the C64 is dying ... any plans to go on Amiga or other type of machine?

B: Well I am no real games player and I only know the C64 so when that dies I will not be upgrading, just playing or bettering the prog I already have.

P: As in every interview there are some silly questions, I'll ask some too ...

B: Favourite game: Rail traffic controller - Penzance

demo: Bogman

group: Ikari

demogroup: Origo

Hobbies next to computer: all aspects of railways, particularly photography and collecting relics old or new.

Girl of my dreams: over 53 years this takes a lot of thinking about, possibly the one and only Marilyn Monroe.

My biggest disappointment: when I really saw the inner workings of Dominators.

My greatest moment: when I got my first 1541.

What I regret: only regrets I have are those connected with constant copying, I get around 10 packets each day from around Europe and this leaves me with very little time to do anything else. I have to copy and do any other C64 work whilst Ann is working. I do not use the C64 in the evenings.

My personal slogan: 'Lamers, walk before you try to run II'

P: Let's continue ... when I say these words/names, tell us what jumps into your head.

B: Deadline - British

Dominators - good luck

Cracking - what time is it

Games - not enough

F4CG - quality (slime, slime ed)

Talent - Bod

Marriage - err... OK

Beer - mine's a pint

Modem - wish I had one

Pirates - best paper mag (aaaaaargh, slimeball !!! ed)

P: As a cracker you surely have some other crackers you look up to ... who and why?

B: With my limited talents I look up to all other crackers, few are worse than me, most are far better. On the current scene I salute them all.

P: How did you get in the cracking work anyway ?

B: Well, as I more or less explained earlier I did crack a lot of games for my own personal satisfaction and use but I got serious when the UK groups fell off a bit in 1988/89, I was getting new stuff and put it out because these guys were making a long break.

P: Have you got any enemies in the scene ? How comes ?

B: The last thing I want on the scene are enemies. But sadly just recently some rumours have been flying about regarding things I am supposed to have said, like someone rings me up and tells me something, maybe a rumour. Then they ring up someone else to tell them that I have said it. Also recently I have had some originals from certain sources which have been 're-cracked'. I think they were sent on purpose but anyway I passed them on only to get phone calls like "where did you get the original ?" or "it must be a re-crack". So I do have some enemies, but who ??? I certainly don't want that reputation, I don't care, personally I find it a laugh but other people might not see things this way.

P: There's a nuclear war ... you get the chance to escape to a tropical island, what five things or persons would you take with you ?

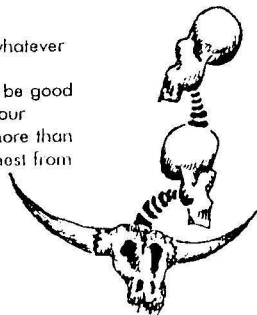

- B: 1. my wife Ann  
2. brewery  
3. pizza house  
4. my railway collection  
5. C64

P: To end this short (??) interview I'll let you greet your best friends and add whatever you want to say to the readers.

B: Well, I don't know what to say here, I consider most of my C64 contacts to be good friends also, so I will say to them all good wishes for the future and I hope our friendships continue. I doubt if I could offer good advice, maybe I need it more than most. Many thanks for the interview, it is nice to get some things off your chest from time to time and this is a sure good way.

P: Thanks for answering all questions my friend.
